

TRACIE BURROWS

PRINCIPAL GEOLOGIST

BAppSc (Applied Geology)
AIG

EXPERTISE

Tracie's expertise includes geological resource modelling and estimation, resource auditing and due diligences, grade control and sampling, blending and ROM pad management and reconciliation. Tracie is also experienced in computer automation, macro writing, and scripting for numerous mining software packages; training in all aspects of mine grade control and mine geology skills.

SUMMARY OF EXPERIENCE

Tracie joined AMC in January 2006 as a Senior Geologist. Since then she has project managed and been part of project teams undertaking feasibility studies, mineral resource estimations, resource audits and due diligences of base metals, nickel, porphyry copper, gold, hard rock tin, iron ore and mineral sands deposits both in Australia and overseas.

Other projects include planning of exploration programmes, the building of interactive user interfaces for mine scheduling and resource estimation in the Datamine software and on site training in:

- Mine geology skills.
- Mining software packages.
- Mineral resource estimation.

From April 2004 Tracie worked as the Geological Superintendent for Bluestone Mines responsible for all underground mine geology, underground and surface exploration activities as well as being involved in the re commissioning of flooded workings.

From 2003 to March 2004 she worked as a Contract Resource Geologist, working primarily for junior exploration companies.

From 2000 to March 2003 Tracie worked as Senior Geologist and then Geological Superintendent at the Renison tin mine in Tasmania. Preceding this, Tracie was Mine Geologist / Computer Support at Renison from July 1996. This role supported and trained geologists, mining engineers and surveyors.

Tracie joined the Technical Computing group at Pasminco's Broken Hill in February 1995, working in both the underground and open pit mines, resource systems development and training.

Tracie began her career in 1992 as a geologist working for Pasminco Exploration.

Tracie's full resume is available upon request.
